Tata Chemicals empowering the youth with skills development at its 'Apprenticeship Training School'

Mumbai, Tata Chemicals' flagship Apprenticeship Training School (ATS) in Mithapur has been empowering the local youths for over 60 years with a goal to provide specialized industrial training and apprenticeship. This Apprenticeship Training School was established by Tata Chemicals in 1954 and since then it has trained lakhs of youths to develop skills on the field thereby, empowering and making them self-sufficient to work in any manufacturing industry across sectors. Mr. R. Nanda, Chief Human Resources Officer, Tata Chemicals, said, "As we observe the World Youth Skills Day today in a challenging context, rising youth unemployment has become of the most significant issues at hand in today's world, for developed and developing countries alike. In post-COVID-19 world, as young people are called upon to contribute to the recovery effort, they will need to be

equipped with the skills to successfully manage evolving challenges and the resilience to adapt to future disruptions." "Initiatives like the 'Apprenticeship Training School' will continue to encourage the youth to follow the right direction and give them hope in a world filled with uncertainties. We, at Tata Chemicals have been committed to support the livelihoods of the local community by way of providing skill training for years. It is the reaffirmation of our commitment to train and develop the local youths in the skills required for a resurgent India", Mr. R. Nanda added. Since inception, Tata Chemicals has invested heavily in the Apprenticeship Training programme to produce qualified and skilled technicians who then gain employment not only with Tata Chemicals but also with other manufacturing industries across India. To encourage these youths, the

company offers them stipend during the course which in turn boosts their morale. Students who complete their course at ATS are in great demand for the skills they possess and they secure employment opportunities not only at the manufacturing facility of Tata Chemicals but in several leading industries in the region. The ATS strives to empower local youth by ensuring that 75-80% of its students are locals. Currently, the ATS has 187 students in the various trades of Maintenance & Operations. These include Boiler Attendants, Electricians, Fitters, Instrument Technicians, and Computer Operators etc. The ATS faculty has industry experience so that they can relate more with the practical requirements of an industry. The credibility of the ATS can be gauged by the fact that it has notched up a record of nearly 100% placement of its students for the last 10 years.

Covid-19: IKEA's Hyderabad store shut down again

Hyderabad, Swedish home furnishing multinational IKEA shut down its store in Hyderabad from Saturday in the wake of the spike in Covid-19 cases in the city. Forty days after re-opening the store, the retail giant has once again downed the shutters. The move came amid growing number of coronavirus cases in Hyderabad. "We are temporarily closing the store to come back better and stronger," IKEA said in its message to the customers. IKEA India CEO & CSO Peter Betzel, in a letter to customers on IKEA website announced that the store will be shutdown from Saturday. "As you know, after a period of lockdown, we opened our operations in Hyderabad, starting with

online in May and then our store in June, with all the hygiene and safety precautions," he said. "In the light of the current Covid situation and to strengthen the safety and well-being of our co-workers and customers, we want to take all our experiences and learnings during the last weeks and to further build a safer and even better shopping experience in our store. In order to do this in a responsible way, we will close our store for our customers from Saturday the 18th of July. We are aiming to re-open soon, to meet all our customers even stronger and inspiring manner," Peter Betzel added. However, the company will continue to meet customers' furnishing needs through online store. Customers can shop with ikea.in by choosing either delivery at home or using our safe and contactless click and collect service from the store. He announced that click and collect service will be free during the period that the store remains closed.

IKEA's home furnishing services of remote planning, personal shopper and home furnishing consulting will also remain open. Located in HITEC City, the information technology hub, it is IKEA's first and so far the only store in India. It was closed on March 20 even before the lockdown was implemented to contain the spread of Covid-19 in the country. It re-opened on June 8 with strict measures to ensure safety of visitors. IKEA had launched the store in August 2018 with an investment of Rs 1,000 crore. The 4,00,000 square feet store offers 7,500 products, including 1,000 products priced below Rs 200. It also has a 1,000-seater restaurant, which is the biggest for IKEA in its global network, offering Swedish and Indian cuisine.—IANS

Business Brief

Bharat Bond ETF scheme's 2nd tranche oversubscribed over 3 times

New Delhi, Centre backed Bharat Bond Exchange Traded Fund (ETF) schemes second tranche was oversubscribed more than three times, a senior official said on Friday. According to T.K. Pandey, Secretary, Department of Investment and Public Asset Management, the second tranche has seen an estimated collection around Rs 10,000 crore with wide participation across categories. "Final numbers are still being tallied and will be released by Monday," he tweeted. The second tranche of ETF was launched on July 14 with two new series, after the successful launch of the initial series of ETFs in December 2019. The scheme is an initiative of the Government of India, from the Department of Investment and Public Asset Management and the latter has given the mandate to Edelweiss AMC to design and manage the product. The two new Bharat Bond ETF series will have maturities of April 2025 and April 2031. The ETF will invest in constituents of the NIFTY BHARAT Bond Indices, consisting of AAA rated public sector companies, an Edelweiss statement had said.

US stocks end mixed amid earnings, coronavirus concerns

New York, US stocks closed mixed in volatile trading on Friday as investors digested earnings reports and weighed coronavirus impact. The Dow Jones Industrial Average dropped 62.76 points, or 0.23 per cent, to 26,671.95. The S&P 500 rose 9.16 points, or 0.28 per cent, to 3,224.73. The Nasdaq Composite Index increased 29.36 points, or 0.28 per cent, to 10,503.19, Xinhua reported. Seven of the 11 primary S&P 500 sectors finished higher, with utilities up 2.28 per cent, leading the advances. Energy shed 1.52 per cent, the worst-performing group. US-listed Chinese companies traded mostly higher, with six of the top 10 stocks by weight in the S&P US Listed China 50 index ending the day on an upbeat note. On the earnings side, Netflix reported second-quarter earnings that fell short of analyst expectations, sending the stock down 6.52 per cent.

US dollar slips amid strength in euro

New York, The US dollar weakened in late trading on Friday amid a strong momentum in the euro. The dollar index, which measures the greenback against six major peers, was down 0.42 per cent at 95.9450. The euro rallied as market participants paid close attention to a key European Union (EU) summit on Friday and Saturday in Brussels, where EU leaders are expected to discuss the bloc's response to the coronavirus pandemic on the fiscal front. In late New York trading, the euro rose to \$1.1436 from \$1.1378 in the previous session, and the British pound rose to \$1.2565 from \$1.2546 in the previous session. The Australian dollar increased to \$0.7000 from \$0.6967, Xinhua reported. The US dollar bought 106.95 Japanese yen, lower than 107.37 Japanese yen of the previous session. The US dollar was down to 0.9382 Swiss franc from 0.9448 Swiss franc, and it rose to 1.3576 Canadian dollars from 1.3573 Canadian dollars.

Diesel now more than rupee expensive than petrol in Delhi

New Delhi, Diesel has further extended its gain over petrol prices in the national capital with oil marketing companies raising its price by 17 paise a litre on Saturday while keeping retail gasoline prices unchanged. Unexpected rise in diesel prices for the past couple of weeks despite slower demand has made the transport fuel take the numero uno position in Delhi while substantially reducing the gap with petrol in other metros. Last month, diesel prices overtook that of petrol in the national capital, in an unprecedented development. Diesel was priced at Rs 81.52 per litre on Saturday in the capital, higher than the previous level of Rs 81.35 a litre. Petrol prices, however, remain unchanged at Rs 80.43 a litre, the same level as June 29 when it's pump price rose marginally by 5 paise over previous days price. Along with the Capital, diesel prices marginally increased in other metro cities as well but there the price of transportation fuel is still between Rs 6-8 per litre lower than petrol. The Oil companies began daily revision of the two auto fuels from June 7 after keeping the price unchanged for 82 days during Covid-19 related lockdown.

Cautiously optimistic over sales trend: Honda2Wheeler

New Delhi, Despite healthy off-take in June on a sequential basis, two-wheeler major Honda Motorcycle & Scooter India is 'cautiously optimistic' about future sales prospects given the uncertainties over local lockdowns. In a conversation with IANS, Yadvinder Singh Guleria, Director, Sales and Marketing, HMSI, cited challenges like local lockdowns, rising Covid-19 cases and seasonality of rural consumption as detrimental to a consistent sales' off-take. "Even though our June sales performance from May has been encouraging, the company and the industry face severe challenges in terms of the new normal of Covid-19 and the impact that it has had on the economy as a whole," he said. "We are far away from matching last year's numbers in terms of dispatch and there will be challenges to ramping up production and aligning supply chain, issues of migrant labour and of social distancing on the assembly lines." Accordingly, Guleria pointed out the company's sales activity had only kicked off in earnest during June, when 95 per cent of the network was opened-up across the country. "We can say that only in June did we see the business activities start in terms of sales and aftersales in our network," Guleria said.

Foxconn rival Luxshare acquires Wistron's iPhone plant

Beijing, AirPods supplier Luxshare has acquired a factory from iPhone supplier Wistron for \$471.5 million and would start making iPhones in Kushan, Jiangsu province in China, the media reported. The acquisition by Luxshare as its first iPhone assembly plant will pave the way for the company to move up the Apple supply chain and challenge Taiwanese rival Foxconn, which has long dominated iPhone production, reports Nikkei Asian Review. The deal will be completed by the end of this year, pending approval from the authorities. According to the report citing sources, the acquisition "is with Apple's consent and it is part of Apple's plan". Luxshare will start to do iPhone assembly in China, while Wistron will focus on iPhone manufacturing in India. Apple has been assembling some of its phones in India for a while via its two manufacturer partners - Foxconn and Wistron. Wistron assembles new iPhone SE while Foxconn makes iPhone XR in the country.

India may remain invested in Farzad-B without development right

New Delhi, India's quest for building its energy security may see it continue to pursue investment opportunity in Farzad-B gas field in Iran even though ONGC Videsh Ltd (OVL) may not get to develop the block that it discovered over a decade ago. Highly placed sources in the oil ministry said that Indian consortium including Indian Oil, Oil India and OVL, which bagged the exploration contract for Farzad-B in 2002, may remain invested in the upstream project as equity partners with other local and international entities even without operatorship or development rights. This, they said, will allow the consortium to get their share of gas to India at applicable rates de-

termined by Iran. Though the exploration contract signed by the Indian consortium expired in 2009, official sources said that a deal could be negotiated so that India has a presence in the field as equity investors. Farzad-B, which was discovered by OVL in the Farzad block about 10 years ago, had in-place gas reserve of 21.7 trillion cubic feet, of which 12.5 Tcf is believed to be recoverable. If India gets a share of this gas, it could reduce its dependence on expensive LNG. Iran has been dilly dallying over grant of development right of Farzad-B for few years now. Things have come to a standstill since US sanctions on Iran in 2018 with India also moving slowly on the matter. Sources said that

changes in geo political scenario in the COVID-19 world, which suggests that Iran is coming closer to China while proximity of India is growing towards US, may further spoil the deal to develop the field. In fact, information coming out from Iran now suggests that the country may offer it to a local entity rather than OVL. If Iran decides to offer equity holding in the project, Indian consortium's claims would once again be considered. "There are two issues to Farzad-B project. Iran may not be giving development rights to OVL but an Indian consortium continues to have part ownership of the block and would get its share of profit whosoever develops the project," the source quoted earlier said. OVL-led consortium

have invested close to \$100 million in the project. Farzad-B was discovered by OVL in the Farzad block about 10 years ago. India and Iran were initially targeting concluding a deal on Farzad-B field development by November 2016 but later mutually agreed to push the timeline to February 2017. The deadline to wrap up negotiations was later targeted for September 2017. But, with deal stuck over pricing of gas. Sanctions delayed the process thereafter and despite visits of ministers from both sides no agreement could be reached. OVL pushed for the deal with a sweetened offer that included investment of close to \$11 billion. But that also did not break the ice and the project remains in limbo.

Solar manufacturing may get VGF support to cut Chinese imports

New Delhi, In an attempt to reduce dependence on the Chinese imports, the Central government plans to come out with a fresh solar tender that will provide viability gap funding (VGF) to projects setting up solar wafer and ingot manufacturing facilities. Silicon wafers and ingots are critical components that go into manufacturing solar cells and modules. However, India does not have manufacturing facilities for these components that is largely imported from China, even by local solar cell and module makers. China is the biggest maker of these components globally. "Under the phased manufacturing plan in solar, government may provide

the VGF support to developers of these critical solar components. This high technology manufacturing would change the face of domestic equipment market and eliminate dependence on imports," said official sources. The fresh initiative is to give a boost to local manufacturing as part of the Atmanirbhar Bharat mission. While there is push to set up solar cell and module manufacturing in India, absence of wafer and ingot facilities dented these plans as these critical components will continue to be brought from abroad. Chinese companies dominate the Indian solar components market, supplying about 80 per cent of solar cells and modules used here, given their competitive pricing.

Blood test to detect Covid-19 result in 20 mins: Study

Sydney, Australian researchers have been able to detect positive Covid-19 cases using blood samples in about 20 minutes and identify whether someone has contracted the virus. The research team developed a simple agglutination assay - an analysis to determine the presence and amount of a substance in the blood - to detect the presence of antibodies raised in response to the SARS-CoV-2 infection. The researchers at Monash University in Australia were able to identify recent Covid-19 cases using 25 microlitres of plasma from blood samples, the study, published in the journal ACS Sensors, reported. "This simple, rapid, and easily scalable approach has immediate application in

SARS-CoV-2 serological testing, and is a useful platform for assay development beyond the Covid-19 pandemic," said study researcher Banaszak Holl. The researchers said that positive cases of Covid-19 cause an agglutination or a clustering of red blood cells, which is easily identifiable to the naked eye. While the current swab/PCR tests are used to identify people who are currently positive with Covid-19, the agglutination assay can determine whether someone had been recently infected once the infection is resolved. Agglutination tests based on the commonly employed blood typing methods are a viable option since these blood typing tests are employed in hospitals worldwide with high-

throughput, fast (10-30 min), and automated in most cases. According to the researchers, using a simple lab setup, this discovery could see medical practitioners across the world testing up to 200 blood samples an hour. At some hospitals with high-grade diagnostic machines, more than 700 blood samples could be tested hourly - about 16,800 each day. The findings could help high-risk countries with population screening, case identification, contact tracing, confirming vaccine efficacy during clinical trials, and vaccine distribution. "This test can be used in any lab that has blood typing infrastructure, which is extremely common across the world," the study authors wrote.

Google to add quick access emoji bar in Gboard for Android

San Francisco, Witnessing a steep rise in the emoji use worldwide, Google has rolled out a quick access emoji bar in Gboard beta version, which would be available to all Gboard Android users in the coming months. The new emoji shortcuts bar in Gboard will appear right above the key-

board. With the emoji bar, users would be able to quickly use multiple emoji without having to switch to the dedicated emoji page on the keyboard. In the current Gboard version, the users need to tap on the emoji icon next to the spacebar in order to open the emoji page. According to Google, there has been over 40 per cent rise in the use of emoji during the shelter-in-place and social distancing times as people now have more emoji options than ever before.

NOTICE TO SHAREHOLDERS
TRANSFER OF EQUITY SHARES TO INVESTOR EDUCATION & PROTECTION FUND (IEPF) SUSPENSE ACCOUNT

Notice is hereby published pursuant to the provisions of the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 ("the IEPF Rules") notified by Ministry of Corporate Affairs from time to time.

The IEPF Rules, amongst other matters, contain provisions for transfer of all shares in respect of which dividend has not been paid or claimed by the shareholders for seven consecutive years in the name of Investor Education Protection Fund Suspense Account ("IEPF Suspense Account")

Accordingly, Shares of those Shareholders who have not claimed or encashed their dividend for seven consecutive years from 2012-13 (Final Dividend) will be transferred to IEPF Suspense Account. Individual communication is being sent to those shareholders whose shares are liable to be transferred to IEPF Suspense Account under the said Rules at their available address.

Shareholders are requested to note that both the unclaimed dividend and the shares transferred to IEPF Suspense Account including all benefits on such shares, if any, can be claimed back by them from IEPF Authority after following the procedure prescribed by the IEPF Rules.

The Shareholders whose shares are liable to be transferred to IEPF Suspense Account, may note that the company would be issuing duplicate share certificate(s) in lieu of the original share certificate(s) held by them for the purpose of transfer of shares to IEPF Suspense Account as per IEPF Rules and upon such issue, the original share certificate(s) which stand registered in their name will stand automatically cancelled and be deemed non-negotiable. Further, the Shareholders holding shares in dematerialised form and whose shares are liable to be transferred to IEPF Suspense Account as per IEPF Rules, the Company will give necessary delivery instruction slip to Depository Participants to affect the transfer of such shares.

The Shareholders are requested to claim the unpaid dividend on or before 25th October, 2020 or such other date as may be extended from the Company or the Registrar, failing which the Company will be compelled to transfer the shares to the IEPF Suspense Account without any further notice, with a view to complying with the requirements set out in IEPF Rules.

For any clarification on the matter, please contact the Company's Registrar and Transfer Agent: M/s. Link Intime India Private Limited, 5th Floor, 506 to 508, Amarnath Business Centre - 1 (ABC-1), Beside Gala Business Centre, Nr.
